You'll get error messages like this: " The operation couldn't be completed.. Though QuickBooks Mac suffices all the accounting needs of Mac users, the issues that are associated with it cannot be ignored.. For the most part, in spite of Intuit's "not supported" stance, it seems to be working fine.. So let's wait and see what issues may crop up with 2010 and 2011 versions before we worry about Intuit "making us upgrade" So far I haven't seen the huge number of issues related to running QB for Mac on Mountain Lion, that we saw right after Lion came out.. Is there an equivalent keyboard shortcut & indeed Task Manager for carrying out such tasks as quitting an application that maybe 'hanging' (amongst other things) for Apple Macs, or indeed anything similar? I would expect this to be dealt with fairly quickly, but in the meantime, one workaround is to log into your Merchant Service account and process the cards there.. How do I fix this error?• For Windows users • If you have payroll turned off in your Desktop file, but have payroll turned on in your QuickBooks Online subscription.. They aren't saying that 2011 and below are going to be buggy All they are saying is that if you have an issue running QuickBooks for Mac 2011 on Mountain Lion, and you call the support line, they won't be able to help.. You'll be able to download the payments into your QB file and match them up with invoices or create Sales Receipts from there.
